

DEPARTMENT OF OBSTETRICS **& GYNECOLOGY**

MATERNAL AND FETAL MEDICINE ELECTIVE

Course Director: Vinette Greenland, MD

Duration: 4 weeks

GOALS

The goal of the program is to broaden the student's knowledge and understanding of the treatment of high-risk obstetric patients in all areas of OB/GYN care, including ultrasound, ante-partum fetal surveillance, and genetic counseling on both an inpatient and outpatient basis.

EDUCATIONAL EXPERIENCE

1. To understand the definition of maternal fetal medicine
2. To learn contemporary management of complicated pregnancies
3. To learn contemporary prenatal diagnosis, counseling, and intervention

CLINICAL EXPERIENCE

The student will participate in tertiary care high-risk obstetric service and observe procedures involving state-of-the-art ultrasonography, fetal heart rate patterns, antepartum fetal surveillance, and genetic counseling at Nassau University Medical Center. The modern methods of prenatal diagnosis and intervention as well as evaluation of maternal and fetal well-being will be stressed.

DIDACTIC EXPERIENCE

The medical students will be expected to participate in all departmental lectures and conferences. They will attend daily morning rounds and teaching sessions and participate in management of high-risk patients.

RESEARCH

The Department of Obstetrics and Gynecology is actively clinical research, and many opportunities exist for student participation in research in any area of reproductive medicine including gynecologic oncology, reproductive endocrinology including gamete and embryo research, urogynecology and pelvic reconstructive surgery, high-risk obstetrics, women's health care and preventive medicine, and all areas of general obstetrics and gynecology.

METHODS OF EVALUATION

Progress will be evaluated at the end of rotation.

SUGGESTED READING MATERIALS

1. Obstetrics: Normal and Problem Pregnancies. 5th Edition by Gabbe, Niebyl and Simpson
2. Selected journal articles
